

K KUDOS
SHOWERING SOLUTIONS

A Great British company producing great British products

For over 20 years Kudos have designed and manufactured high quality showering products, our 2022 collection brings together innovative design, functionality and value, helping you to create the perfect solution for your bathroom. From doors and enclosures through to shower trays, wet-room systems and over-bath screens, whichever Kudos product you choose you can be sure of getting a great British product from a Great British company.

The difference is in the detail

Every Kudos product has been hand built by craftsmen who have an enduring passion for design and an abiding commitment to quality. All covered by the Kudos lifetime guarantee* our extensive product range should provide the ideal solution for your needs, if not, then consider Kudos Signature, our bespoke shower solution tailored to your exact requirements.

*See website for details.

aqua4ma evolution centre waste deck

aqua4ma

EVOLUTION

Shower decks and wet-room system

Recognised for ease of fitting and reliability, Kudos aqua4ma systems have been successfully installed in 1000s of UK homes.

aqua4ma Evolution combines all the benefits associated with the original aqua4ma system with additional features which reflect the evolving demand for a more versatile, easier to fit and cost-effective wet-room solution.

With aqua4ma evolution you can create the perfect wet-room look, confident and secure in the knowledge that what's below the surface will protect your home for years to come, backed by the Kudos Lifetime Guarantee.

Choose from two styles of shower decks; **end waste** which can be finished with straight tile cuts or **centre waste** which can be finished with angled tile cuts. Both options are suitable for tiles or micro cement.

Individually made: each Aqua4ma Evolution shower deck is individually CNC machined from a solid block of specially formulated high density exterior grade PVC; the material is totally waterproof requiring no additional treatment.

Weld, screw or glue: Aqua4ma joints are solvent welded together with Aqua4ma solvent paste to provide a one-piece permanent waterproof barrier that is guaranteed for life. aqua4ma Evolution shower decks and panels can be screwed to wooden floors and battens without any washers as the material self seals around the screws. Alternatively aqua4ma decks or wall panels can be glued to solid floors and walls using flexible based tile adhesive.

Trim: aqua4ma Evolution shower decks and panels can easily be trimmed and shaped using a hand or circular saw.

Finishing: once fitted, the decks and panels are ready for immediate finishing with tiles or micro-cement.

Total or selective waterproofing: use aqua4ma Evolution shower decks on their own or combine with aqua4ma floor and wall panels for a total watertight installation.

aqua4ma

evolution shower decks

Choose from two styles of shower decks; **end waste** which can be finished with straight tile cuts or **centre waste** which can be finished with angled tile cuts. Both options are also suitable for tiles or micro-cement.

Features

- + Quick and easy to install
- + Easily trimmed to fit or to avoid joist obstruction
- + Overall depth of just 25mm
- + Suitable for tiles or micro-cement
- + Fit anywhere in the home on wooden or solid floors
- + Can be fitted at joist level on wooden floors*
- + Ready for tiling immediately with no wet trades required
- + Compatible with Aqua4ma floor and wall panels for a total wet-room installation
- + Lifetime Guarantee
- + British Made

* Decks should be fully supported by creating a false floor between joists

Aqua4ma Evolution End Waste Shower Deck:

Measuring 1340 x 1000mm the Aqua4ma Evolution End Waste Shower Deck can be easily trimmed from either (or both) sides or from either end that meets a wall.

End waste shower deck consists of:

- + 1340 x 1000mm Evolution Deck
- + Stainless Steel Waste Support Plate
- + 2 Side Levelling Strips
- + Waste Assembly
- + Tile Thickness Adjustment Mouldings
- + Stainless Steel Waste Grid (Polished Silver or Matt Black)

Aqua4ma Evolution Centre Waste Shower Deck:

Available in 7 sizes the Aqua4ma Evolution Centre Waste Shower Deck offers a versatile solution for any wet-room installation. Each deck can be trimmed from any side that meets a wall.

Centre waste shower deck consists of:

- + Evolution Deck
- + Stainless Steel Waste Support Plate
- + Waste Assembly
- + Tile Thickness Adjustment Mouldings
- + Stainless Steel Waste Grid (Polished Silver or Matt Black)

An evolution in wet-room system design

Shower Panels

By adding aqua4ma shower panels to your Evolution shower deck you can extend the amount of waterproofing to suit your needs, each joint is welded together using aqua4ma solvent weld paste, ensuring that it is watertight.

The minimum recommended installation will use aqua4ma skirting panels where the shower deck touches a wall as this ensures that there will be no water penetration between the deck and the wall even if there is a grout or silicone failure on the surface finish.

Calculating the amount of material required for your chosen installation is easy, for skirting simply measure the length of the area that the aqua4ma deck and any flooring panels will touch a wall. For flooring, measure the area of the floor and deduct the amount of space needed for the deck that you have chosen, for wall panels simply calculate the area of the wall to be covered. aqua4ma floor and wall panels measure 1200mm x 800mm (just under 1 square metre), you should also allow approx. 10-15% extra for wastage, whilst keeping in mind that as joints are solvent welded you can make use of any off-cut pieces.

Typical Installation

Installation of Evolution deck only

This installation incorporates aqua4ma Evolution shower deck kit (End or Central Waste) plus the addition of aqua4ma skirting panels* where the deck meets the wall.

Installation of Evolution deck and floor

aqua4ma floor panels can be added to extend the protected floor area ensuring no water penetration through cracked tiles or grout failure. Skirting panels should be added where floor panels meet walls*. Aqua4ma joints are solvent welded together making a one piece watertight floor.

Installation of Evolution deck and shower walls

aqua4ma panels can be added to provide total watertight protection where there is a defined showering area contained by an enclosure or screen. If fitting to a stud wall, then 15mm tongue & groove Aqua4ma panels can be used in place of plaster board. If fitting directly to plastered walls then 7mm Aqua4ma boards can be used and fixed with a flexible tile adhesive.

Installation of Evolution deck, shower walls and floor

Protect your floor and shower area with a combination of floor and wall panels.

*** For a perfect watertight installation, Aqua4ma skirting or wall panels should be fitted wherever Aqua4ma decks or floor panels meet a wall**

Aqua4ma Versatility

Aqua4ma Evolution shower decks are easy to trim, either to fit the available size, or to shape around ducting etc. Aqua4ma 15mm tongue and groove wall panels can be screwed directly to battens in place of plasterboard and, as the material self seals around screws, no washers or additional sealing is necessary. Aqua4ma panels also provide stable fixing for accessories.

In addition to 15mm wall boards, Aqua4ma panels are available in 7mm panels for flooring and solid walls and 25mm for more structural requirements such as seats and shelves. These can be screwed into place and permanently bonded with Aqua4ma solvent weld paste for guaranteed watertight joints.
